50X1-HUM

1. In the vicinity of the village of Kapitanovtsi (N 44-03, E 22-51), of Vidin, work allegedly started recently on the construction of a new munitions depot. This depot is composed of an unspecified number of underground tunnels, has a capacity of approximately 600 freight cars of munitions, is allegedly being constructed at present by a full battalion of Trudovaks, and is to be connected to the Vidin-Bryagovo by means of a new road.
2. It should be noted that the village of Kapitanovtsi is already connected to the Vidin-Bryagovo road by a dirt road which joins this road near Smurdan (N 44-02, E 22-49). However, obviously this road is not sufficient to handle the traffic necessary for a munitions depot.
